

Dear Hiring Manager,

1.4.24

Recomenation letter to Hanna Bawardi.

I am running a hub and I have been a lecturer and a multiple time as project manager, R&D manager and CEO, I had worked with over 250 students in academics and industry internship project and I know Hanna for one year in a project has done with us.

Hanna is an exceptionally talented and devoted data scientist, with an engaged and inquisitive mind with a “can-do” approach compared to the many data scientists I met during the years.

I write this letter with the strong support of the project manager working with Hanna from the non-profit project on women's health.

I am writing to strongly recommend Hanna for any future projects or opportunities. As someone who completed a Natural Language Processing (NLP) project under my supervision, demonstrated exceptional skills in understanding project requirements, identifying appropriate technologies to be used, and developing efficient code in Python to analyze text in Hebrew and visualize data.

Throughout the project, Hanna was highly proactive and engaged, demonstrating excellent communication skills and the ability to collaborate effectively with colleagues. Hanna worked closely with his team to ensure that project milestones were achieved on time.

Hanna displayed a strong command of the Python programming language and applied it skillfully to analyze and visualize text data in Hebrew. He demonstrated excellent research skills and the ability to work independently, always displaying a can-do attitude and an eagerness to take on new challenges.

The results of the project were outstanding, and Hanna demonstrated an excellent understanding of the field of NLP and its applications. ability to deliver quality work on time and within constraints was highly commendable, and his problem-solving skills were exceptional.

Hanna has a strong work ethic, great technical skills, and a passion for developing. He would be a valuable addition to any team or project. I highly recommend him for any future projects or opportunities.

Sincerely,

Dr. Ofer Merkman
